ABOUT ME

Hi, I'm Jano, I am 21 years old self-taught frontend developer. I started to programming in the 2020 pandemic! And I discovered that I really love to learn all about coding everytime. I already have knowledge in Vanilla Javascript, CSS3 and HTML5 (You can check my github profile) and now I am really interested on learning a framework, I've started with Vue.js basics (soon you will see updates on my github with a few projects on Vue.js). I consider my self as a organized and responsible person, with good interpersonal relationships. Please do not hesitate to contact me if you want a really compromised employee.

EDUCATION

- Aprende JavaScript, 2022

Curso de cero a experto todos los conceptos del lenguaje

<https://aprendejavascript.org/>

- midudev, 2022

Youtube channel

<https://www.youtube.com/c/midudev>
